DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-9, 13-16, 18-22, 24-28, 36-56 and 60-63, drawn to identify, to store and to display meta-tags having associated metadata representing semantic object, classified in class 707, subclass 3.
- II. Claims 57-59, drawn to network component, router and access policy of semantic object, classified in class 709, subclass 224.

The inventions are distinct, each from the other because of the following reasons:

- Inventions I and II are related as subcombinations disclosed as usable together in a single combination.
- The subcombinations are distinct from each other they are shown to be separately usable.

In the instant case, invention I has separate utility such as identify, store and display meta-tags having associated metadata representing semantic object. Invention II has separate utility such as network component, router and access policy of semantic object. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Ms. Yenyun Fu on 22 May 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
